

# Project Prerequisites

## Critical (Required to Start Core Work)

- 1 Screening product details (name, purpose, questionnaire/device based)
- 2 Final questionnaire content with question types and rules
- 3 Approved consent text and versions
- 4 Patient data fields (mandatory and optional)
- 5 Screening workflow confirmation (session, consent, locking)

## Required Before Device Integration

- 1 Device type, model, and ID format
- 2 Data format, units, sampling frequency
- 3 Communication protocol details (MQTT/WebSocket/REST)
- 4 Sample payloads and authentication method

## Infrastructure & Access

- 1 Hosting decision (cloud or on-premise)
- 2 Environment access (dev, staging, production)
- 3 Credentials, broker access, domain/SSL details

## Governance & Approvals

- 1 Single point of contact for approvals
- 2 Review and sign-off process with turnaround time
